

CL – GROOVE JOINT

A HIGH PERFORMANCE NON-STRUCTURAL PVC EXPANSION / DECORATIVE JOINT FOR WALL

DESCRIPTION

CL – GROOVE JOINT is a high performance non-structural dual purpose polyvinylchloride expansion joint as well as a decorative joint. It is used to isolate and subdivide large wall plaster surfaces to alleviate the problems of surface cracks and debonding of plaster due to thermal movement as well as to provide an aesthetic appearance to a large monotonous piece of external wall.

USES

- To alleviate surface cracks and debonding of plaster caused by thermal movement
- To provide aesthetic finishes to a monotonous plastered wall by forming grids.

FEATURES

- Highly durable polyvinylchloride expansion joint
- Provide a neat joint
- Highly resistance to most contaminants
- Maintenance free as compared to traditional sealant joint
- Ease of installation

INSTALLATION

CL-GROOVE JOINT can be used to divide areas of plaster before rendering. The wall is marked and the groove joints are then positioned and secured with mortar on its sides. The mortar may be applied beneath the joint. The thickness of the mortar beneath it depends on the alignment of the wall.

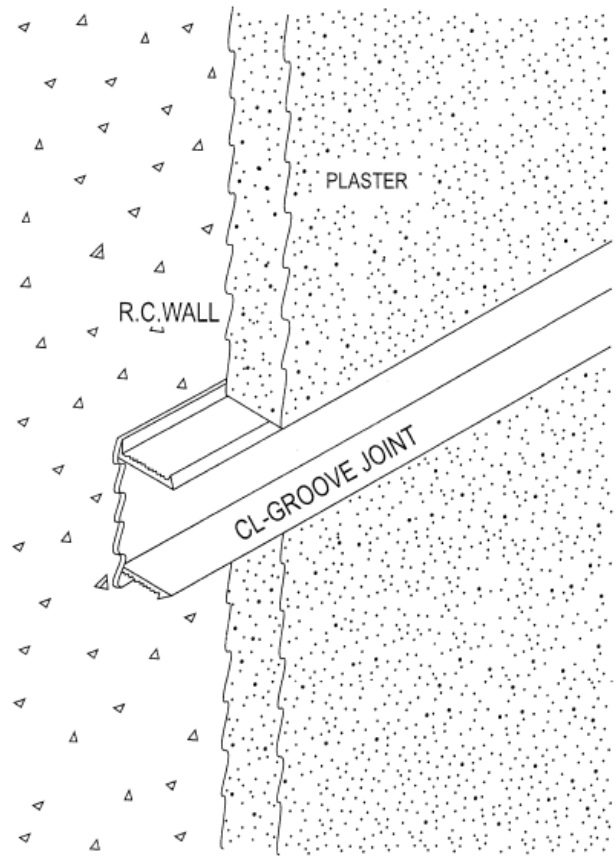

After securing the groove joints with mortar, it is then left to set for at least one working day before proceeding to render plaster to the wall.

DIMENSION

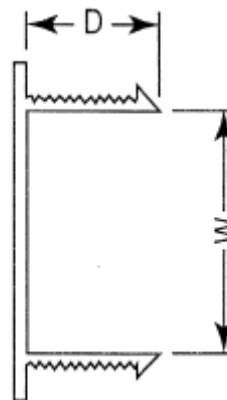

Model GJ-1510	15mm (W) x 10mm (D) x 2m (L)
Model GJ-2015	20mm (W) x 15mm (D) x 2m (L)
Model GJ-3016	30mm (W) x 16mm (D) x 2m (L)

PACKING

100 lengths per carton.
